

## **WATERPROOFING MADE EASY!**

Drizoro manufactures the most comprehensive range of cementitious waterproofing products currently available.

Drizoro offers a unique system of products providing both, positive and negative waterproof sealing, rising damp proofing as well as decorative finish in one step.

The Drizoro System includes Maxrest, Maxrite rapid set repair mortars, Maxjoint Elastic flexible joint sealants, waterproofing hydraulic expanding cements Maxplug to seal against actual waterflow, Maxgrip hydraulic expanding anchoring cement to set fixings, starter bars, to waterproof and seal in pipes or services penetrations.

Maxseal and Maxseal Foundation commonly used for, positive or negative waterproofing or sealing against rising damp of all masonry surfaces, including concrete, block, brick, renders AAC blocks & panels.

Maxseal Flex a flexible cement based waterproofing membrane for application to surfaces subject to movement.

Ideal for reverse tanking, repair and sealing rising damp and against positive or negative water pressure, of above and below ground masonry surfaces.

Waterproofing of swimming pools. Sealing lift wells, retaining walls, garden beds, tanks and walls requiring damp proofing or waterproof decorative finishes. Repair and waterproofing of balcony, road and concrete floor and roof surfaces.

Also available is a full range of clear saturant waterproofing products for protection against water entry to masonry and stone surfaces. Efflorescence (salt) removers as well as a sealer for surfaces subject to dusting and heavy traffic.

We carry the full range of SWEPCO bituminous roofing repair and asphalt sealing products including reflective coatings

With our extensive range of products we have the answer to all your waterproofing needs.

*Don't just waterproof it...  
**DRIZORO it!***

**WILL SEAL AGAINST STATIC WATER PRESSURE  
DRIZORO PRODUCTS MUST BE APPLIED TO WET SURFACES**

## MAXSEALFLEX®

MAXSEALFLEX a flexible cement based waterproof negative/positive coating suitable for masonry surfaces including retaining walls, water tanks, swimming pools, fish ponds, water features, basements, balconies etc.

- Available in Grey or White and colour standard.
- Use on internal or external surfaces.
- Must be applied to a wet surface.
- Easy application by brush.
- Texture to achieve decorative finish.
- Add acrylic paint tints or oxides to achieve colours.
- UV stable. 2 COMPONENT KIT
- Packaging: 7kg, 14kg Handi-Pack, 35kg Kit

## MAXSEAL SUPER®

MAXSEAL SUPER is a cement based waterproof negative/positive coating suitable for masonry surfaces including retaining walls, water tanks, swimming pools, water features, basements etc.

- Non-toxic. Drinking water safe.
- Coarse grade, Grey and White
- Use on internal or external surfaces.
- Must be applied to a wet surface.
- Easy application by brush.
- Texture to achieve decorative finish.
- Add acrylic paint tints or oxides to achieve colours.
- UV stable, Crystalline and Osmotic.
- Packaging: GREY/WHITE, 25kg Bag

## MAXSEAL FLEX-M®

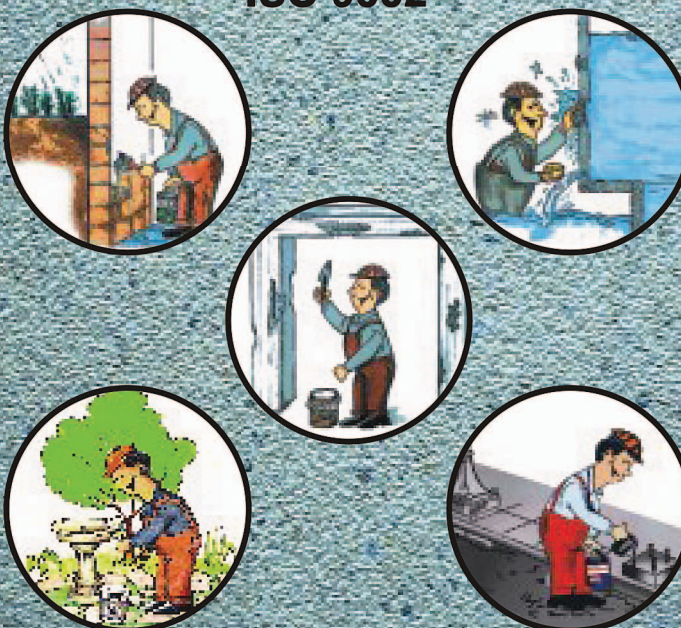

MAXSEAL FLEX "M" flexible cement based waterproof negative/positive coating suitable for masonry surfaces including retaining walls, water tanks, swimming pools, water features, basements, balconies etc.

- UV stable, drinking water safe
- Available in Grey or White and colour standard.
- Use on internal or external surfaces.
- Must be applied to a wet surface.
- Easy application by brush.
- Texture to achieve decorative finish.
- Add acrylic paint tints or oxides to achieve colours.
- UV stable.
- Packaging: 22kg Bag – SINGLE COMPONENT

# DRIZORO®

## Construction Products

### ISO 9002

## MAXREST®

MAXREST is a non-shrinking and quick-setting mortar to repair concrete and masonry surfaces.

- Non-toxic. Drinking water safe.
- Non-shrink, non-slump, rapid setting repair mortar for repairs to concrete and masonry.
- Repair damage to masonry quickly without the use of formwork.
- Sets within 15-20 minutes allowing for quick and easy repairs without a long curing time.
- Ideal for spalling and concrete cancer repairs.
- Use on internal or external surfaces.
- Must be applied to a wet surface.
- Packaging: 5kg, 15kg Handi-Pack, 25kg

## MAXPLUG®

MAXPLUG is a rapid-setting and non-shrinking hydraulic cement that stops leaks under pressure. It is used to seal leaks instantly in concrete surfaces and solid masonry.

- Ideal for use in water tanks, swimming pools, around pipe penetrations etc.
- Non-toxic. Drinking water safe.
- Available in Grey only.
- Sets in 2-3 minutes.
- Will set under water.
- Use on internal or external surfaces.
- Must be applied to a wet surface.
- Packaging: 1kg, 5kg, 15kg Handi-Pack, 25kg

## MAXGRIP®

MAXGRIP is a waterproof hydraulic anchoring cement for concrete and masonry

- Ideal for setting anchor bolts, starter bars, posts, hand railings, heavy machinery, fences etc.' in concrete. Used to fill and seal around pipe penetrations in slabs.
- Sets in 15-20 minutes allowing for fast anchoring in masonry
- Non-toxic. Odourless. Drinking water safe.
- Must be applied to a wet surface.
- Contains no sulphur or iron particles - will not oxidise.
- Packaging: 2kg, 5kg, 15kg Handi-Pack, 25kg

## MAXQUICK ROLL®

MAXQUICK ROLL is a single component, cement-based waterproofing, decorative coating for application in a single layer.

- Single layer roll-on waterproof barrier whilst being permeable to water vapour.
- Single component - only requires water.
- Use on internal or external surfaces.
- Must be applied to a wet surface.
- Easy application by brush or roller.
- Texture to achieve decorative finish.
- Available in standard white, add acrylic paint tints or oxides to achieve colours.
- Packaging: 25kg
